SUMMARY

A seasoned app developer with a demonstrated history of success at three employers. Developed production-level applications, including dating, e-commerce, college administration, and invoicing applications, using Android native and Flutter. I have successfully worked with entrepreneurs to improve the user experience and functionality of their applications, thereby bringing their concepts to life.

SKILLS & ABILITIES

- Hybrid application development for cross-platform compatibility
- I am proficient in the development of the backend using Node.js, Express, and MongoDB.
- Expertise in the integration of APIs Proficient in the development of Android native and Flutter applications
- Proficient in comprehending business logic and developing apps designed for effective business implementation.

PROJECTS

Feb 2024 - Jun 2024

Lelekart ecommerce app

App link: [Android](#) | [iOS](#)

I created the LeleKart app in Flutter & FlutterFlow for Android and iOS, connected APIs for fast data sharing, and built e-commerce business logic, such as payment systems and inventory management. This job helped me improve my technological abilities and get insight into e-commerce industry operations.

Sep 2022 - Jan 2023

Dazel Dating App

Source code: [GitHub](#)

Featuring an advanced matching algorithm that employs over 30 parameters, real-time chat implementation, geolocation-based matching and an explore section for personalized profile recommendations, the Dazel Dating App was developed in Flutter and FlutterFlow, with Node.js, Express, and MongoDB.

Apr 2023 - May 2023

Collage Management App

Source code: [GitHub](#)

The app developed with Flutter and Firebase, boasts a user-friendly interface and optimized workflows for administrative, teaching, and office tasks. It also includes role-based access control and distinct user panels.

May 2022 - Jun 2022

WholeSale Trade Link App

Internal use only, not publicly available

Developed the 'Agency and Offer App' in Android using Java and connected it to a Firebase server. Streamlined invoicing processes, ensured secure data storage, and automated the generation of PDF bills for agents.

EXPERIENCE

Feb 2024 - Jun 2024

Mobile App Developer, Pune, Maharashtra

MyMegaMinds

Developed the LeleKart Flutter app for cross-platform functionality, integrated APIs for smooth data exchange, and designed e-commerce business logic including payment systems and inventory management.

Sep 2022 - Jan 2023

Full Stack Developer, Kolkata, West Bengal

Indomitech Group

Developed a cross-platform stock market app and SPA for Android/iOS using Apache Server (MySQL DB), Flutter, and FlutterFlow.

Jul 2022 - Aug 2022

Android Developer Intern (Online)

Ur Engineering Friend

Received ongoing Android Studio (Java) tasks, including replicating Amazon and YouTube homepages, enhancing my app development expertise.

EDUCATION

2023 - 2026

Bachelor of engineering in Artificial Intelligence & Data Science

Dr. DY Patil College of Information & Technology, Pimpri, Pune

2020 - 2023

Diploma in Computer Science – 86.06%

Dr. Panjabrao Deshmukh Polytechnic, Amravati

AWARDS

1st Winner

Codethon

Mobile App Development Hackathon at MIT WPU - 2024

1st Winner

Hash It Out

Mobile App Development Hackathon at Dr. DY Patil Institute of technology - 2024

1st Runner up

Data Verse

DSA Coding Competition at Dr. DY Patil Institute of technology - 2023

1st Runner up

Blind C

Techno Stream (National Level Technical Event) At Dr. PD Polytechnic Amravati - 2022

CERTIFICATION

58hr length

Mastering Data Structures & Algorithms using C and C++

Certificate Link: [Udemy](#)

33hr length

Supervised Machine Learning: Regression and Classification

Certificate Link: [Stanford University, DeepLearning.AI, Coursera](#)
